

CARING FOR YOUR POOL

Last day for Early Buy saving is April 15th!

Get Ready for the
SEASON

Pool Care

Equipment Upkeep

Auto Covers

Pool Maintenance

Early Buy Chemicals

Backyard Experience

Pool Opening

Pool Closing

Now that your swimming pool is ready for use:
here are 3C's to pool care.

3C'S

1 CIRCULATION

- 🕒 The filtration system is recommended to run 24 hours per day to maintain the best water quality.
- 🔄 When you turn off the filtration system, you also turn off your pool's ability to sanitize & heat the water.

NOTE: your pool's start-up PSI on the filter guage. When PSI increases 10psi over the start up or when water flowing from the returns feels weak...it is time to backwash or chemically clean the filter media to improve water flow.

2 CLEANING

- Stagnant water will most likely have a clarity or algae issue. Surfaces can become slippery and produce unsafe swim conditions.
- You should physically clean the pool 1-2 times per week depending on use.
- 🧹 Brush the walls, stairs, water line, vacuum, empty the skimmer & pump baskets.

3 CHEMISTRY

Weekly water testing & adjustments to the water will help avoid major clarity issues of the pool.

Below are the most common side affects for unbalanced water:

- 🧪 Low chlorine will bloom algae & be hazy/cloudy
- 🧪 High chlorine & unbalanced PH may cause skin irritation & make your liner more susceptible to wrinkling & fading
- 🧪 Low ALK will damage the heat exchanger of the pool's heater

Filters: Cartridge, Earth, and Sand

Overall life expectancy is 7-10 years with regular care (general replacement of wearable parts is normal).

✂ Grids/Cartridges 2-4 years (2 x year chemical cleaning)

✂ O-rings & Gaskets may need to be replaced to prevent leaks

Cartridge Filter See more at Pentair.com

- Must rinse cartridges monthly with garden hose
- Chemical clean filter at least 2 x per season or after a major clarity clean up

Earth Filter See more at Pentair.com

- Routinely backwash to expel trapped debris in housing
- Rinse grids as needed with garden hose
- Chemically clean grid twice per season or after major clarity clean up

Sand Filter See more at Pentair.com

- Change sand every 2-3 years or as needed
- Chemically clean sand at least 1x per season or after major clarity clean up

Mid-Season Filter Cleaning

\$110.00 (Reg. \$150.00)

- Rinse off filter grids or cartridges
- Inspect & note repairs if needed
- Chemical Clean

**To be completed in the month of July.*

Filter Before Cleaning

Filter After Cleaning

**photos are examples only, results may vary*

Heater See more at Pentair.com

Good care is balancing water chemistry weekly to prevent damage to the exchanger, completing a heater tune up & maintenance of pool heater yearly, and proper winterization. Normal life expectancy is 7-10 years with regular care.

🔥 Excessively warming pool water can make the pool liner more susceptible to liner wrinkling.

Heater Tune Up & Maintenance: **\$150.00**

(Reg. \$175.00) – parts & labor for repairs are not included.

- | | |
|---|---|
| • Check heater for leaks & operation | • Clean burner & injectors of deposits & spider webs* |
| • Clean corroded electrical connections | • Clean out cabinet of all debris |
| • Clean heat exchanger of debris* | • Check & adjust gas pressure |
| • Clean pilot & ignitor* | • Inspect venting |
| • Set max temp if no spa (90°)* | • Inspect unitherm regulator * |

() If applicable*

Intellichlor (salt cell) See more at Pentair.com

- Power center (2-4 years)
- Salt cell (2-4 years) depending on use & care

Salt Cell Cleaning: **\$90.00 (Reg. \$120.00)**

- An effective way to clean your cell
- Help extend the life of your salt system
- Protect your salt system investment
- Reduce problems due to scale formation

MANUFACTURER RECOMMENDS MONTHLY CLEANING OF CELL.

Protect your investment to protect your pocket book!

The auto cover is a great investment in your swimming pool to provide overall peace of mind. It keeps the pool safe from unwated debris, swimmers, & lowering your operating costs.

It is important to open the cover during the day a few times per week to allow the water to “breath or gas off.” This lets contaminates that have entered the water to be removed from the pool through oxidation.

Below are a few suggestions for routine maintenance to keep your system operating smoothly.

- Rinse the tracks with a garden hose monthly to keep the tracks free of debris
- Remove all debris from the inside of the auto cover housing at the start of each season or as needed
- Remove large debris & water from the top of the cover prior to opening
- Gently “bump” the key switch when opening and closing of the cover when near 6”-12” of the end of the pool. This will help prevent damage to the stops & glides of the auto cover
- Clean the cover & apply vinyl protectant to cover yearly

Keep pump on cover at all times to move water from top of pool cover.
[Information on Cover Blast® >](#)

Life Expectancy of Cover

- Wearable parts on the cover (ropes, slides, guides ect) are expected to last 2-3 years with regular upkeep and careful operation when in use.
- Cover material is expected to last 6-10 years with cleaning & vinyl protection

[Limited Warranty >](#)

[Fabric Warranty >](#)

#1 Auto Cover Maintenance

- Lubricate all pulleys & fittings
- Flush dirt from tracks & tighten loose screws
- Adjust cover operation
- Complete a 12 point inspection

#2 Auto Cover Basic Cleaning

- Wash cover (using specially formulated cleaner)
- Remove debris & wash out auto cover housing
- Clean auto cover pump
- Apply cover protectant

#3 Combo (Maintenance & Cleaning)

- Everything listed in #1 Auto Cover Maintenance and #2 Auto Cover Basic Cleaning

CARIBBEAN'S POOL & SPA MAINTENANCE PROGRAMS

maintenance@caribbeanpools.com

A LITTLE OF THIS

A LITTLE OF THAT

A LOT OF THIS

We do offer maintenance packages for in-ground pool owners who are looking for a little less work and a lot more play. Our staff of pool pros will maintain your pool's water balance and keep it clean; letting you focus on enjoying your pool.

SILVER (2 x week chemical assist):

We will check chemical levels while you are committing to the weekly cleaning and maintenance of your pool. During our visits, we will add chemicals needed to maintain proper levels. The technician will make chemical adjustments based on pool side chemical test. They will bring a water sample to be computer analyzed as needed. This one's for the almost do-it-yourselfer.

GOLD (2 x week with single vacuum):

We will assist you with your weekly maintenance responsibilities. Have fun in your pool knowing we are checking on your pool each week with you. There will be two visits per week. At the first visit the technician will spend approximately 30-55 minutes brushing the walls, vacuuming the pool, adding chemicals, filling chlorine feeders/ skimmers, back washing as needed. The technician will make chemical adjustments based on pool side chemical test. They will bring a water sample to be computer analyzed as needed.

PLATINUM (2 x week full cleaning & chemicals):

We will care for your pool as if it were our own. By choosing this plan you'll know you have lowered your stress levels and can enjoy your backyard oasis to the fullest. During our visits, we will spend approximately 30-55 minutes brushing the walls, vacuuming the pool, adding chemicals, filling chlorine feeders/skimers, back washing as needed. The technician will make chemical adjustments based on pool side chemical test. They will bring a water sample to be computer analyzed as needed.

**additional chemicals, service repairs, or chlorine demand correction are not included in any of our maintenance programs*

SEASON USAGE PACKAGES:

Introducing!

BIOGUARD
TruBlue
PROMISE

Never miss a moment™

It's a promise to you...
If your water gets algae, we will
clear it up for FREE.

**see store for details*

PROGRAM QUALIFICATIONS:

- 1) Pool Owner must own an in-ground or aboveground pool (does not apply to swim spas)
- 2) Pool Owner must use a chlorine sanitizer, a saltwater chlorinator or Mineral Springs® (no bromine or biguanide systems)
- 3) Chlorine Pool Owners must purchase qualifying products in the minimum quantities from each of Step 1, Step 2 AND Step 3.

The qualifying products are:

- Step 1 / Sanitizer (12 lbs. or greater) – SilkGuard Complete®
- Step 2 / Shock (12 lbs. or greater) – SmartShock®, Easy Shock & Swim®, BurnOut® 3, BurnOut® 73, OxySheen®, CLC® 3 or CLC® Classic
- Step 3 / Algicide – (1 bottle) Algae Complete® or (2 bottles) Back Up® 2 or Banish® or Algae All 60®

- 4) Mineral Springs Pool Owners must purchase (2 bags) Mineral Springs® Beginnings® PLUS (12 bags) Mineral Springs® Renewal® PLUS (4 bottles) Mineral Springs® Stain & Scale
- 5) Salt Pool Owners must purchase qualifying products in the minimum quantities from each of Step 2 AND Step 3 PLUS the recommended accessory products.

The qualifying products are:

- Step 2 / Shock (12 lbs. or greater) – SmartShock®, Easy Shock & Swim®, BurnOut® 3, BurnOut® 73, OxySheen®, CLC® 3 or CLC® Classic
- Step 3 / Algicide – (1 bottle) Algae Complete® or (2 bottles) SaltScapes® Algae Remover
- Accessories – (2 bottles) SaltScapes® Scale Defender AND (1 bottle) SaltScapes® Cell Cleaner

- 6) Pool Owner must have water tested regularly using ALEX® and perform recommended water adjustments
- 7) Registration does not carry over and Pool Owners must renew for the program each year

- Spa purge service available
- Spa maintenance service
- Spa opening service
- Spa winterization service
- Replacement spa covers (see store for details)

Big Green Egg® grill & smoker
[see more>](#)

Big Green Egg Tune Up: **\$125.00** (Reg. \$150.00)

The high temperature gasket and fittings all need to be tuned-up regularly to keep your Big Green Egg operating at optimal levels. Also, Big Green Egg recommends removing and brushing off the internal parts annually for peak performance. By addressing these areas annually, you can continue to enjoy using your Big Green Egg problem free!

- Removal of all charcoal pieces, ash, and debris
- Replace gasket seal on base, dome and chimney
- Make any adjustments to dome and base to insure proper seal
- Tighten all fittings
- Inspect dome, base, fire ring, and fire box for any damage.
(Submit for warranty replacement if needed)

POOL OPENINGS:	Economy	Economy w/ Chemicals	Basic	Special

POOL CLEANING & BALANCE: \$750 (pool must be operational prior to 1st cleaning visit)

SPA OPENINGS:	March	April	May
Stand Alone	\$105.00	\$125.00	\$145.00
with Attached Equipment	\$85.00	\$105.00	\$125.00

Order Opening NOW

Items NOT included in any of our opening packages: Chlorine demands, softswim, accessory chemicals, Frog mineral reservoir, new water chlorine cartridges, mineral springs renewal or beginnings, metal removal & service repairs. All pricing assumes pool was operational previous season. We reserve the right to decline opening a customer's pool upon arrival. If the pool was closed with colored or dirty water.....expect the same or worse water condition at opening. It will take extra time to clean it up in the Spring. We suggest opening the pool in early to mid April to prevent additional algae growth & to give you plenty of time to clean it up. Planning ahead keeps from cutting into your swim season and can also save money!

CARIBBEAN CLOSING: \$390.00

- Start system & note any leaks for repairs
- Skimmer line(s) blown & plugged with gizzmos
- Pool return line(s) blown & plugged
- Bottom drain blown & air locked
- Remove/dispose of CHL / Frog cartridge
- Shut off gas valve(s) at Equipment / Meter
- All timers turned off & remove on / off switches
- Automation / breakers / power to smart pumps off
- Drain filter (restarted plug on DE / Cart filters)
- Heater drained & blown out
- Remove equipment plugs / gauges
- Remove eyeballs / escutcheon

Choose from any of our additional closing services to make saying “good bye” to the pool season a little easier.
